MPHO SELLO

Bloemfontein, Free State, South Africa | 067 668 7955 | sellompho1601@gmail.com | linkedin.com/in/mpho-sello-692193241

PROFESSIONAL SUMMARY

Final-year ICT Diploma student with a strong foundation in data analysis, business intelligence, and AI-driven decision-making, seeking to grow into a Data Analyst role through a structured, rotational development environment. Hands-on experience across the full analytics lifecycle, data cleaning, SQL querying, DAX modelling, and Power BI dashboard design, applied to real-world and public datasets. Certified across IBM Skills Build and Oracle Analytics Cloud, with exposure to cloud data concepts and a self-driven, methodical approach to mastering new tools. Actively builds and maintains independent technology platforms, demonstrating the initiative, curiosity, and cross-functional problem-solving mindset needed to thrive across data, engineering, and AI disciplines.

KEY SKILLS

- Adaptability & Willingness to Learn
- Communication & Interpersonal Skills
- Teamwork & Collaboration
- Problem-Solving & Attention to Detail
- Initiative & Strong Work Ethic
- Time Management & Reliability
- Administrative Support & Professionalism
- Adaptive Person & Workplace Readiness
- Purposeful & Manages Complexity

TECHNICAL SKILLS

- Data Analysis, Data Collection & Data Compilation
- Business Intelligence & Dashboard Development
- Data Management, Data Cleaning & Reporting
- Data Architecture
- Statistical Analysis & Predictive Analytics
- Computer Literacy

ELIGIBILITY

- South African Citizen | Unemployed Graduate | Based in the Free State | Available immediately

RELEVANT EXPERIENCE & PROJECTS

- **Retail Store Sales - Data Cleaning, Analysis & Dashboard**
  Cleaned and validated a 12,575 row synthetic retail transactions dataset in Excel, recovering missing values through logical formulas rather than guesswork and catching real calculation errors via a dedicated verification layer. Built a color-coded Excel dashboard summarizing revenue, quantity, discounts, and payment behavior by category.

- **Retail Sales - Data Cleaning, Analysis & Dashboard**
  Cleaned a 1,825-row daily retail sales dataset by inferring missing categories through elimination logic, imputing missing sales and quantity figures using category medians, and flagging unrecoverable regions rather than fabricating them. Analysis covers sales, quantity, and profit trends by category and region across a full calendar year.

- **Store Sales Analysis Data Cleaning, Analysis & Dashboard**
  Analyzed 5,000 retail transactions in Excel, resolving a key data ambiguity (whether discounts were already reflected in transaction amounts) through hypothesis testing and source verification, then built a PivotTable-driven dashboard with a dedicated verification layer to track payment behavior, demographics, and seasonal order trends.

EDUCATION

Diploma in Information and Communication Technology (ICT) - Sol Plaatje University, 2023 – 2027
National Senior Certificate - Bainsvlei Combined School, 2019

CERTIFICATIONS & TRAINING

- FNB App of the Year Awards - Academy Participant | Oracle Analytics Cloud | Oracle
- Cloud Database Fundamentals | IBM | Data Certificate & e-Certificate | IBM Skills Build
- Python 101 for Data Science | IBM Skills Build | Spark Fundamentals I | IBM Big Data University
